

Laycock 24 Bucket Magnet Wire Rack

MODEL:LA-MWR24

Each wire coming from the bucket is guided and protected through porcelain long life eyelets.

Designed for high-speed coil winding, while saving time and space.

Access to both sides allows loading or unloading only the bucket or reel needed.

The wires are guided to the multiple hole nylon panel located at the front of the rack where each wire is secured until ready for use

Note: Feed the wire through the ceramic bushings, and the wire guide in front of the frame, one wire per hole.
